01_Costa Bacelo	<p>Property in Serra da Freita, Arouca, owned by a company (Altri Florestal) and with a stewardship contract with MONTIS.</p> <p>The area is included in the Nature 2000 SAC Rio Paiva (PTCON0059), a wolf territory, and it's located on the left bank of river Paiva, and is also limited by river Paivô. The riparian galleries of the area are well preserved and the focus of the work relies on supporting the natural values of the area, by controlling invasive alien species, boost natural regeneration and increase biodiversity with planting and sowing of native species.</p> <p>Area managed: 23.9 ha</p>	 <p>https://montisacn.com/areas-geridas/costa-bacelo/</p>	2015	Jointly managed	Private
02_Vieiro	<p>Property in Serra da Freita, São Pedro do Sul, owned by a company (Altri Florestal) and with a stewardship contract with MONTIS.</p> <p>The area is included in the Nature 2000 SAC Serras da Freita e Arada (PTCON0047), a wolf territory, and it's characterised by its mountain habitat, with a river that crosses the property and a well-preserved riparian gallery. MONTIS work has been focused on controlling the invasive species threats, boost natural regeneration by supporting it and increase the biodiversity values with planting and sowing of native species.</p> <p>Area managed: 25.9 ha</p>	 <p>https://montisacn.com/areas-geridas/vieiro/</p>	2015	Jointly managed	Private
03_Baldio de Carvalhais	<p>Property in Serra da Arada, Carvalhais (São Pedro do Sul), is part of a common land managed by the parish council, under a stewardship contract with MONTIS to preserve and restore the nature values of the land.</p> <p>The area is included in the Nature 2000 SAC Serras da Freita e Arada (PTCON0047), a wolf territory, characterised by its mountain habitats. Due to no management and wildfires the forest was replaced with a scrubland without a landscape mosaic.</p> <p>MONTIS focuses the work in recovering the forest mosaic of the area using a prescribed fire plan, increasing the seed bank of native species with plantations and sowings, support of natural regeneration and of natural processes, including through natural engineering.</p> <p>Area managed: 100 ha</p>	 <p>https://montisacn.com/areas-geridas/baldio-de-carvalhais/</p>	2015	Jointly managed	Community
04_Baldio da Granja	<p>Property in Valadares, São Pedro do Sul, is part of a common land managed by the parish council, under a stewardship contract with MONTIS to preserve and restore the nature values of the land.</p> <p>The area is in one of the slopes from the river Varosa valley, and MONTIS work is focused in controlling the invasive alien species, support natural regeneration and sowing native species to increase biodiversity.</p> <p>Area managed: 2,6 ha</p>	 <p>https://montisacn.com/areas-geridas/baldio-da-granja/</p>	2016	Jointly managed	Community
05_Cerdeirinha	<p>Property in Valadares, São Pedro do Sul owned by a private landowner with a stewardship contract with MONTIS.</p> <p>The area was burned (although lightly) in a wildfire in 2017 and the restoration work is focused on supporting the nature regeneration of the cork oaks and common oaks of the area and decrease with natural processes the density of eucalyptus trees.</p> <p>Area managed: 3.6 ha</p>	 <p>https://montisacn.com/areas-geridas/cerdeirinha/</p>	2018	Jointly managed	Private

site_Id	Description	Website	Intervention Start Year	Site management	Site ownership
06_Quinta das Lamas	<p>Property in Vouzela owned by a private owner with a stewardship contract with MONTIS.</p> <p>The area managed by MONTIS is mainly occupied by invasive species so the main objectives for this property are to control invasive species and support the natural regeneration of native species.</p> <p>Area managed: 2.2 ha</p>	 <p>https://montisacn.com/areas-geridas/quinta-das-lamas/</p>	2022	Jointly managed	Private
07_Picôto - Cambra de Baixo	<p>Property in Cambra, Vouzela with almost 1 ha owned by a private landowner and with a stewardship contract with MONTIS to preserve the natural values of the area as well as to increase biodiversity with ecological restoration works. The area includes a well-preserved riparian gallery.</p> <p>The main focus on this land is to support natural regeneration of the existing flora (oaks, riparian gallery trees) and to increase the species of flora by planting and sowing native species.</p> <p>Area managed: 1 ha</p>	 <p>https://montisacn.com/areas-geridas/picoto/</p>	2020	Jointly managed	Private
08_Levides	<p>Property in Levides, Vouzela owned by a private landowner and with a stewardship contract with MONTIS to preserve the natural values of the area as well as to increase biodiversity with ecological restoration works. The area includes a water stream that divides the property in two.</p> <p>The main focus on this land is to support natural regeneration of the existing flora (oaks and cork oaks), manage the density of shrubs and increase the species of flora by planting and sowing native species.</p> <p>Area managed: 4.8 ha</p>	 <p>https://montisacn.com/areas-geridas/levides/</p>	2019	Jointly managed	Private
09_Cabrieira	<p>Together with Dumação, these properties are located in Caramulo mountains and are included in the Local Natural Park Vouga-Caramulo, Vouzela. MONTIS acquired them through a crowdfunding campaign to conserve the nature values of the oakland existent in it.</p> <p>In 2017, during a very destructive wildfire the properties burned and the work done for nature conservation was reassessed. MONTIS decided to wait for spring to see how the vegetation would react to the fire, and since the oaks have started to sprout again from the roots we have focused the work in supporting the nature regeneration of the trees, the control of the smaller vegetation and on the reinforcement of the riparian gallery (and other areas) with species characteristic of Caramulo mountains.</p> <p>Area: 3.2 ha</p>	 <p>https://montisacn.com/areas-geridas/carvalho-de-vermilhas/</p>	2015	MONTIS	MONTIS
